

Small, Medium & Large Business Security Suite

Choose the offer that best suits your needs

GravityZone is a business solution that can be installed locally or hosted by Bitdefender. Multi-layered protection with proven machine learning, advanced heuristics, anti-ransomware, powerful anti-exploit, signatures, Firewall and Device Control are included in each of the options below

GravityZone Business Security <i>Ideal for small businesses looking for simple, yet efficient security.</i>	GravityZone Business Security Premium <i>Recommended to companies looking for aggressive protection against sophisticated threats.</i>	GravityZone Business Security Enterprise <i>Recommended to companies looking for an integrated next-gen endpoint protection & EDR platform that accurately protects against sophisticated cyber threats.</i>	GravityZone à la carte <i>Recommended for companies looking for integrated security with maximum licensing flexibility.</i>

Management Options	On premises / Cloud	On premises / Cloud	On premises / Cloud	On premises / Cloud
Types of Endpoints Protected Consistent, next-gen defenses across any type of endpoints				
Physical and Virtual Workstations & Servers <i>State of the art security for end-user devices.</i>	✓	✓	✓	✓
Server Security with Smart Centralized Scanning (VDI, DaaS) - on-premises or in the cloud. (Also available by CPU socket licensing.) <i>Pro-VM, Pro-Cloud defenses with Smart Centralized Scanning for high performance and optimum user experience.</i>	●	✓	✓	✓
Mobile Devices <i>Device and platform agnostic mobile security.</i>	●	(On-Premises Console only) ✓	(On-Premises Console only) ✓	(On-Premises Console only) ✓
Microsoft® Exchange <i>Unrivalled defense against malware, spam & phishing attempts.</i>	●	✓	✓	✓
Security Technologies				
Prevention Modules				
Local and Cloud Machine Learning <i>Predictive detection of unknown malware; Dynamic file analysis trained on billions of samples; Local machine learning trained on 80,000 malware features. Threat intelligence from over 500 million endpoints globally.</i>	✓	✓	✓	✓
Advanced Anti-Exploit <i>Focuses on attack tools and techniques to detect both known and zero-day exploits that target popular software applications.</i>	✓	✓	✓	✓
Automatic Disinfection and Removal <i>Automatically blocks confirmed threats through a set of predefined rules, including process termination, moving to quarantine or access blocking.</i>	✓	✓	✓	✓
Fileless Attacks Defense <i>Protects against attacks that attempt to write changes directly in memory.</i>	●	✓	✓	✓
Network Attack Defense <i>Protects against threats that use network vulnerabilities.</i>	✓	✓	✓	✓
HyperDetect™ (Tunable Machine Learning) <i>Tunable machine learning layer, detects sophisticated threats. Blocks hacking tools, fileless attacks, zero-day malware and more.</i>	●	✓	✓	Add-On
Sandbox Analyzer <i>Sends suspicious files for detonation, analyzes and provides a verdict in real time. Detects zero-day and targeted attacks; Prevents real time attack prevention with auto-submit; Analyzes once enterprise-wide block.</i>	●	✓	✓	Add-On
Detection and Response Modules				
Process Inspector <i>Behavior-based real time detection; Monitors all processes running in the operating system and if the process is deemed malicious, will terminate it. Formerly known as Advanced Threat Control (ATC).</i>	✓	✓	✓	✓
Ransomware Mitigation <i>Creates a real-time back-up of the files before being modified by the suspicious process to mitigate the risk of losing data during advanced ransomware attacks.</i>	✓	✓	✓	✓
Incident Visualization <i>Easy to understand visual guides highlight critical attack paths, easing burdens on IT staff.</i>	●	✓	✓	Add-On
Root Cause Analysis <i>Highlights the attack vector, the attack entry point, and how the attack originated. Helps pinpoint the origin node of attack, highlighted in the Incident page. The confidence score provides context for security events.</i>	●	✓	✓	Add-On
Anomaly Defense <i>Baselines system resources to spotlight unusual behavior based on MITRE threat techniques and Bitdefender's own research.</i>	●	●	✓	Add-On

Small, Medium & Large Business Security Suite

Choose the offer that best suits your needs

GravityZone is a business solution that can be installed locally or hosted by Bitdefender. Multi-layered protection with proven machine learning, advanced heuristics, anti-ransomware, powerful anti-exploit, signatures, Firewall and Device Control are included in each of the options below

GravityZone Business Security
Ideal for small businesses looking for simple, yet efficient security.

GravityZone Business Security Premium
Recommended to companies looking for aggressive protection against sophisticated threats.

GravityZone Business Security Enterprise
Recommended to companies looking for an integrated next-gen endpoint protection & EDR platform that accurately protects against sophisticated cyber threats.

GravityZone à la carte
Recommended for companies looking for integrated security with maximum licensing flexibility.

MITRE Event Tagging MITRE attack techniques & indicators of compromise provide up to the minute insight into named threats & other malware that may be involved.	●	●	✓	Add-On
Hardening and Risk Analytics Modules				
Endpoint Risk Analytics Assesses, prioritizes & hardens endpoint security misconfigurations & settings with an easy-to-understand prioritized list.	✓ (Cloud Console only)	✓ (Cloud Console only)	✓ (Cloud Console only)	●
Web Threat Protection Scans incoming web traffic, including SSL, HTTP and HTTPS traffic, to prevent the download of malware to the endpoint. Automatically blocks phishing and fraudulent web pages. Displays search ratings signaling trusted and untrusted pages.	✓	✓	✓	✓
Device Control Threats are often introduced into the company via removable devices. Choose which devices to allow to run, and decide what will be blocked or scanned automatically.	✓	✓	✓	✓
Application Blacklisting Enables full visibility and control of running applications by blacklisting unwanted software. Helps limit the risk of malicious code running undetected.	✓	✓	✓	✓
Application Control (Whitelisting) Provides full visibility and control of applications installed or running on company endpoints, and prevents the execution of any application not allowed by policy.	●	✓ (On-Premises Console only)	✓ (On-Premises Console only)	✓ (On-Premises Console only)
Firewall Fully-featured two-way firewall that controls applications' access to the network and to the Internet. Furthermore, the firewall can protect the system against port scans, restrict ICS and warn when new nodes join a Wi-Fi connection.	✓	✓	✓	✓
Extend Security with Compatible Products				
Available Add Ons				
Email Security For all email clients, including Office 365.	Available (Cloud Console Only)	Available (Cloud Console Only)	Available (Cloud Console Only)	●
Patch Management Keeps OSes and applications up to date across the entire Windows install base.	Available	Available	Available	Available
Full Disk Encryption Protects data for the entire endpoint hard drive by leveraging the encryption mechanisms provided by Windows (BitLocker) and macOS (FileVault).	Available	Available	Available	Available
HyperDetect™ & Cloud Sandbox Enable HyperDetect™ and Cloud Sandbox for Enterprise a-la-carte licensing.	●	●	●	Available
Endpoint Detection and Response module Enables EDR features on the Enterprise a-la-carte licensing.	●	●	●	Available
Endpoint Detection and Response Storage Enables long term storage of EDR raw data (30, 90 and 180 days).	●	●	Available (Cloud Console Only)	●
Available Services				
Managed Detection & Response Service Pack Staffed by our experienced security analysts and using an award-winning suite of technology, the MDR service monitors detailed telemetry to quickly and effectively respond to malicious activities, actively removing the threat to reduce dwell time and limit any damage.	●	●	Available (Cloud Console Only)	Available when EDR add-on is present
Professional Services Empower your organization with optimal security configuration, protection and tailored services.	✓	✓	✓	✓
Premium Support Choose the Silver ,Gold or Platinum Premium Enterprise Support packages, depending on the response times & the types of proactive services necessary for your organization.	✓	✓	✓	✓
